SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
Trade name : NITROUS OXIDE, NITROUS OXIDE (N25, N47,N50, UHP)
SDS no : 093A
Chemical description : Nitrous oxide
CAS-No. : 10024-97-2
EC-No. : 233-032-0
EC Index-No. : ---
Registration-No. : 01-2119970538-25
Chemical formula : N2O

1.2. Relevant identified uses of the substance or mixture and uses advised against
Uses advised against : Do not inhale product on purpose because of the risk of asphyxiation.

1.3. Details of the supplier of the safety data sheet
Company identification

Supplier
AIR LIQUIDE Deutschland GmbH
Luise-Rainer-Straße 5
40235 Düsseldorf - GERMANY
T +49 (0)211 6699-0 - F +49 (0)211 6699-222
info@airliquide.de

E-Mail address (competent person) : info.SDB@airliquide.de

1.4. Emergency telephone number
Emergency telephone number : +49 (0)2151 398668
Availability : ( 24 / 7 )

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
Classification according to Regulation (EC) No. 1272/2008 [CLP]

Physical hazards : Oxidising Gases, Category 1 — H270
Gases under pressure : Liquefied gas — H280

Health hazards : Specific target organ toxicity — Single exposure, Category 3, Narcosis — H336

2.2. Label elements

Labelling according to Regulation (EC) No. 1272/2008 [CLP]

Hazard pictograms (CLP) :

Signal word (CLP) : Danger
Hazard statements (CLP) : H270 - May cause or intensify fire; oxidiser..
Precautionary statements (CLP)

- Prevention:
P220 - Keep away from clothing and other combustible materials..
P260 - Do not breathe gas, vapours..
P244 - Keep valves and fittings free from oil and grease..

- Response:
P370+P376 - In case of fire: stop leak if safe to do so..
P304+P340+P315 - IF INHALED: Remove person to fresh air and keep comfortable for breathing. Get immediate medical advice / attention.

- Storage:
P403 - Store in a well-ventilated place.

Supplemental information:
Do not inhale product on purpose because of the risk of asphyxiation.

Contact with liquid may cause cold burns/frostbite.

SECTION 3: Composition/information on ingredients

<table>

</tr>
</tbody>
</table>

Contains no other components or impurities which will influence the classification of the product.

SECTION 4: First aid measures

4.1. Description of first aid measures

- Inhalation: Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Apply artificial respiration if breathing stopped.

- Skin contact: In case of frostbite spray with water for at least 15 minutes. Apply a sterile dressing. Obtain medical assistance.

- Eye contact: Immediately flush eyes thoroughly with water for at least 15 minutes.

- Ingestion: Ingestion is not considered a potential route of exposure.

4.2. Most important symptoms and effects, both acute and delayed

In low concentrations may cause narcotic effects. Symptoms may include dizziness, headache, nausea and loss of co-ordination. Refer to section 11.

4.3. Indication of any immediate medical attention and special treatment needed

Obtain medical assistance.

SECTION 5: Firefighting measures

5.1. Extinguishing media

- Suitable extinguishing media: Water spray or fog.

- Unsuitable extinguishing media: Do not use water jet to extinguish.

5.2. Special hazards arising from the substance or mixture

Specific hazards: Supports combustion.

Hazardous combustion products: Nitric oxide/nitrogen dioxide.
5.3. Advice for firefighters

Specific methods:
- Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat radiation may cause gas receptacles to rupture. Cool endangered receptacles with water spray jet from a protected position. Prevent water used in emergency cases from entering sewers and drainage systems.
- If possible, stop flow of product.
- Use water spray or fog to knock down fire fumes if possible.
- Move containers away from the fire area if this can be done without risk.

Special protective equipment for fire fighters:
- Wear gas tight chemically protective clothing in combination with self contained breathing apparatus.
- Standard EN 943-2: Protective clothing against liquid and gaseous chemicals, aerosols and solid particles. Gas-tight chemical protective suits for emergency teams.
- Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
- Try to stop release.
- Evacuate area.
- Monitor concentration of released product.
- Wear self-contained breathing apparatus when entering area unless atmosphere is proved to be safe.
- Eliminate ignition sources.
- Ensure adequate air ventilation.
- Prevent from entering sewers, basements and workpits, or any place where its accumulation can be dangerous.
- Act in accordance with local emergency plan.
- Stay upwind.

6.2. Environmental precautions
- Try to stop release.

6.3. Methods and material for containment and cleaning up
- Keep area evacuated and free from ignition sources until any spilled liquid has evaporated (ground free from frost).

6.4. Reference to other sections
- See also sections 8 and 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling
Safe use of the product:
- The product must be handled in accordance with good industrial hygiene and safety procedures.
- Only experienced and properly instructed persons should handle gases under pressure.
- Consider pressure relief device(s) in gas installations.
- Ensure the complete gas system was (or is regularly) checked for leaks before use.
- Do not smoke while handling product.
- Keep equipment free from oil and grease.
- Use no oil or grease.
- Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt.
- Avoid suck back of water, acid and alkalis.
- Do not breathe gas.
- Avoid release of product into atmosphere.
- For more guidance on safe use, refer to the EIGA Doc.176 “Safe practices for storage and handling of Nitrous oxide”, downloadable at http://www.eiga.org.” and consult your supplier.
- Temperatures above 150°C (300°F) shall be avoided by all practical means, to reduce the
likelihood of an explosive decomposition of the nitrous oxide.
Clean all surfaces in direct contact with nitrous oxide as for oxygen service.
Nitrous oxide transfer pumps shall be provided with an interlock to prevent dry running.
Use self-limiting heating devices. Direct contact electric immersion heaters are not allowed.

Safe handling of the gas receptacle:
Refer to supplier's container handling instructions.
Do not allow backfeed into the container.
Protect cylinders from physical damage; do not drag, roll, slide or drop.
When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders.
Leave valve protection caps in place until the container has been secured against either a wall or bench or placed in a container stand and is ready for use.
If user experiences any difficulty operating cylinder valve discontinue use and contact supplier.
Never attempt to repair or modify container valves or safety relief devices.
Damaged valves should be reported immediately to the supplier.
Keep container valve outlets clean and free from contaminants particularly oil and water.
Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment.
Close container valve after each use and when empty, even if still connected to equipment.
Never attempt to transfer gases from one cylinder/container to another.
Never use direct flame or electrical heating devices to raise the pressure of a container.
Do not remove or deface labels provided by the supplier for the identification of the cylinder contents.
Suck back of water into the container must be prevented.
Open valve slowly to avoid pressure shock.

7.2 Conditions for safe storage, including any incompatibilities:
Observe all regulations and local requirements regarding storage of containers.
Containers should not be stored in conditions likely to encourage corrosion.
Container valve guards or caps should be in place.
Containers should be stored in the vertical position and properly secured to prevent them from falling over.
Stored containers should be periodically checked for general condition and leakage.
Keep container below 50°C in a well ventilated place.
Segregate from flammable gases and other flammable materials in store.
Store containers in location free from fire risk and away from sources of heat and ignition.
Keep away from combustible materials.

7.3 Specific end use(s):
None.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

PNEC (Predicted No-Effect Concentration): No data available.
8.2. Exposure controls

8.2.1. Appropriate engineering controls

: Provide adequate general and local exhaust ventilation.
: Product to be handled in a closed system.
: Systems under pressure should be regularly checked for leakages.
: Ensure exposure is below occupational exposure limits (where available).
: Gas detectors should be used when oxidising gases may be released.
: Consider the use of a work permit system e.g. for maintenance activities.

8.2.2. Individual protection measures, e.g. personal protective equipment

: A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk. The following recommendations should be considered:
: PPE compliant to the recommended EN/ISO standards should be selected.

- **Eye/face protection**
  : Wear goggles when transfilling or breaking transfer connections.
  : Standard EN 166 - Personal eye-protection - specifications.

- **Skin protection**
  - **Hand protection**
    : Wear working gloves when handling gas containers.
    : Standard EN 388 - Protective gloves against mechanical risk.
    : Wear cold insulating gloves when transfilling or breaking transfer connections.
    : Standard EN 511 - Cold insulating gloves.
  - **Other**
    : Consider the use of flame resistant safety clothing.
    : Wear safety shoes while handling containers.
    : Standard EN ISO 20345 - Personal protective equipment - Safety footwear.

- **Respiratory protection**
  : Gas filters may be used if all surrounding conditions e.g. type and concentration of the contaminant(s) and duration of use are known.
  : Use gas filters with full face mask, where exposure limits may be exceeded for a short-term period, e.g. connecting or disconnecting containers.
  : Consult respiratory device supplier’s product information for the selection of the appropriate device.
  : Gas filters do not protect against oxygen deficiency.
  : Standard EN 14387 - Gas filter(s), combined filter(s) and full face mask - EN 136.
  : Keep self contained breathing apparatus readily available for emergency use.
  : Self contained breathing apparatus is recommended, where unknown exposure may be expected, e.g. during maintenance activities on installation systems.
  : Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.

- **Thermal hazards**
  : None in addition to the above sections.

8.2.3. Environmental exposure controls

: Refer to local regulations for restriction of emissions to the atmosphere. See section 13 for specific methods for waste gas treatment.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

**Appearance**

- Physical state at 20°C / 101.3kPa: Gas.
- Colour: Colourless.

**Odour**

: Sweetish. Poor warning properties at high concentrations.

**Odour threshold**

: Odour threshold is subjective and inadequate to warn of overexposure.

**Melting point**

: -90.81 °C

**Boiling point**

: -88.5 °C

**Flash point**

: Not applicable for gases and gas mixtures.

**Flammability range**

: Non flammable.
Relative vapour density at 20 °C: Not applicable.
Evaporation rate (ether=1): Not applicable for gases and gas mixtures.
Vapour pressure [20°C]: 50.8 bar(a)
Vapour pressure [50°C]: Not applicable.
Relative density, gas (air=1): 1.5
Relative density, liquid (water=1): 1.2
Solubility in water: 1500 mg/l
pH value: Not applicable for gases and gas mixtures.
Partition coefficient n-octanol/water [log Kow]: 0.4
Decomposition point [°C]: Not applicable.
Auto-ignition temperature: Non flammable.
Viscosity [20°C]: No reliable data available.
Explosive Properties: Not applicable.
Oxidising Properties: Oxidiser.
- Coefficient of oxygen equivalency (Ci): 0.6

9.2. Other information
Molar mass: 44 g/mol
Critical temperature [°C]: 36.4 °C
Other data: Gas/vapour heavier than air. May accumulate in confined spaces, particularly at or below ground level.

SECTION 10: Stability and reactivity

10.1. Reactivity
No reactivity hazard other than the effects described in sub-sections below.

10.2. Chemical stability
Stable under normal conditions.
At temperatures over 575°C and at atmospheric pressure, nitrous oxide decomposes into nitrogen and oxygen.
In the presence of catalysts (e.g. halogen products, mercury, nickel, platinum) the rate of decomposition increases and decomposition can occur at even lower temperatures.
Nitrous oxide dissociation is irreversible and exothermic, leading to a considerable rise in pressure.

10.3. Possibility of hazardous reactions
Violently oxidises organic material.

10.4. Conditions to avoid
Avoid moisture in installation systems.

10.5. Incompatible materials
May react violently with combustible materials.
May react violently with reducing agents.
Keep equipment free from oil and grease.
For additional information on compatibility refer to ISO 11114.

10.6. Hazardous decomposition products
Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Acute toxicity: Inhalation causes narcotic effects.

LC50 inhalation rat (ppm) 500000 ppm/4h
NITROUS OXIDE

Skin corrosion/irritation : No known effects from this product.
Serious eye damage/irritation : No known effects from this product.
Respiratory or skin sensitisation : No known effects from this product.
Germ cell mutagenicity : No known effects from this product.
Carcinogenicity : No known effects from this product.
Reproductive toxicity :
  Toxic for reproduction : Fertility : No known effects from this product.
  Toxic for reproduction : unborn child : No known effects from this product.
STOT-single exposure : May cause drowsiness or dizziness.
STOT-repeated exposure :
  At low concentrations:
    Neurologic effect.
    Hemotoxic effect.
Target organ(s) :
  Erythrocytes.
  Kidneys.
  liver.
  Central nervous system.
Aspiration hazard : Not applicable for gases and gas mixtures.

SECTION 12: Ecological information

12.1. Toxicity

Assessment : No ecological damage caused by this product.

EC50 48h - Daphnia magna [mg/l] : Study scientifically unjustified.
EC50 72h - Algae [mg/l] : Study scientifically unjustified.
LC50 96 h - Fish [mg/l] : Study scientifically unjustified.

12.2. Persistence and degradability

Assessment : Not applicable for inorganic gases.
Study scientifically unjustified.

12.3. Bioaccumulative potential

Assessment : Not expected to bioaccumulate due to the low log Kow (log Kow < 4).
Refer to section 9.

12.4. Mobility in soil

Assessment : Because of its high volatility, the product is unlikely to cause ground or water pollution. Partition into soil is unlikely.

12.5. Results of PBT and vPvB assessment

Assessment : Not classified as PBT or vPvB.

12.6. Other adverse effects

Other adverse effects : No known effects from this product.
Effect on the ozone layer : None.
Global warming potential [CO2=1] : 298
Effect on global warming : Contains greenhouse gas(es).
  When discharged in large quantities may contribute to the greenhouse effect.
SECTION 13: Disposal considerations

13.1 Waste treatment methods

Contact supplier if guidance is required.
May be vented to atmosphere in a well ventilated place.
Discharge to atmosphere in large quantities should be avoided.
Do not discharge into any place where its accumulation could be dangerous.
Ensure that the emission levels from local regulations or operating permits are not exceeded.
Refer to the EIGA code of practice Doc.30 "Disposal of Gases", downloadable at http://www.eiga.org for more guidance on suitable disposal methods.
Return unused product in original cylinder to supplier.

13.2 Additional information

List of hazardous waste codes (from Commission Decision 2001/118/EC):
16 05 04*: Gases in pressure containers (including halons) containing dangerous substances.

SECTION 14: Transport information

14.1 UN number

UN-No.: 1070

14.2 UN proper shipping name

Transport by road/rail (ADR/RID) : NITROUS OXIDE
Transport by air (ICAO-TI / IATA-DGR) : Nitrous oxide
Transport by sea (IMDG) : NITROUS OXIDE

14.3 Transport hazard class(es)

Labelling:

2.2 : Non-flammable, non-toxic gases.
5.1 : Oxidizing substances.

Transport by road/rail (ADR/RID)
Class: 2.
Classification code: 2O.
Hazard identification number: 25.
Tunnel Restriction: C/E - Tank carriage: Passage forbidden through tunnels of category C, D and E. Other carriage: Passage forbidden through tunnels of category E.

Transport by air (ICAO-TI / IATA-DGR)
Class / Div. (Sub. risk(s)): 2.2 (5.1)

Transport by sea (IMDG)
Class / Div. (Sub. risk(s)): 2.2 (5.1)
Emergency Schedule (EmS) - Fire: F-C.
Emergency Schedule (EmS) - Spillage: S-W.

14.4 Packing group

Transport by road/rail (ADR/RID): Not established.
Transport by air (ICAO-TI / IATA-DGR): Not established.
Transport by sea (IMDG): Not established.
14.5. Environmental hazards
Transport by road/rail (ADR/RID) : None.
Transport by air (ICAO-TI / IATA-DGR) : None.
Transport by sea (IMDG) : None.

14.6. Special precautions for user
Packing Instruction(s)
Transport by road/rail (ADR/RID) : P200.
Transport by air (ICAO-TI / IATA-DGR)
  Passenger and Cargo Aircraft : 200.
  Cargo Aircraft only : 200.
Transport by sea (IMDG) : P200.

Special transport precautions : Avoid transport on vehicles where the load space is not separated from the driver's compartment.
Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency.
Before transporting product containers:
  - Ensure there is adequate ventilation.
  - Ensure that containers are firmly secured.
  - Ensure cylinder valve is closed and not leaking.
  - Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
  - Ensure valve protection device (where provided) is correctly fitted.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code
: Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture
EU-Regulations
Restrictions on use : None.
Seveso Directive : 2012/18/EU (Seveso III) : Covered.
National regulations
National legislation : Ensure all national/local regulations are observed.
Germany
Water hazard class (WGK) : Water hazard class (WGK) 1, low hazard to waters (Classification according to VwVwS, Annex 1 or 2; ID No. 767)
BGR 104, TRBS 2152.

15.2. Chemical safety assessment
A CSA has been carried out.

SECTION 16: Other information
Abbreviations and acronyms : ATE - Acute Toxicity Estimate
SAFETY DATA SHEET

NITROUS OXIDE

CLP - Classification Labelling Packaging Regulation; Regulation (EC) No 1272/2008
EINECS - European Inventory of Existing Commercial Chemical Substances
CAS# - Chemical Abstract Service number
PPE - Personal Protection Equipment
LC50 - Lethal Concentration to 50 % of a test population
RMM - Risk Management Measures
PBT - Persistent, Bioaccumulative and Toxic
vPvB - Very Persistent and Very Bioaccumulative
STOT- SE : Specific Target Organ Toxicity - Single Exposure
CSA - Chemical Safety Assessment
EN - European Standard
UN - United Nations
ADR - European Agreement concerning the International Carriage of Dangerous Goods by Road
IATA - International Air Transport Association
IMDG code - International Maritime Dangerous Goods
RID - Regulations concerning the International Carriage of Dangerous Goods by Rail
WGK - Water Hazard Class

Training advice : None.
Further information : This Safety Data Sheet has been established in accordance with the applicable European Union legislation.

Full text of H- and EUH-statements

| Ox. Gas 1 | Oxidising Gases, Category 1 |
| Press. Gas (Liq.) | Gases under pressure : Liquefied gas |
| STOT SE 3 | Specific target organ toxicity — Single exposure, Category 3, Narcosis |
| H270 | May cause or intensify fire; oxidiser. |
| H280 | Contains gas under pressure; may explode if heated. |
| H336 | May cause drowsiness or dizziness. |

DISCLAIMER OF LIABILITY : Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out.

Details given in this document are believed to be correct at the time of going to press.

Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted.
